ENERGY

167.500 kWh

CLIMATE PROTECTION

94,3 t CO₂

A place only comes alive thanks to the energy of the people who work there – even if its beauty is already as utterly captivating as that of the Historische Stadthalle Wuppertal.

In this respect, we – as the operators – consider ourselves to be the heart and soul of this unique location.

Our highly committed 18 or so staff members bring creativity and experience to the planning and meticulous execution of the up to 500 large and small events that take place in our building every year. The versatility of the venue leaves the imagination of the team and the desires of our customers virtually free rein.

As the “Caretaker of the Citizen’s Palace”, we have always been extremely aware of our social responsibilities and are committed to ensuring that a visit to our venue is a lasting and sustainable experience in every respect – and that it will be so even more in the future.
